

Rio Grande do Sul Airport Investment Plan

Stakeholders

Secretaria de Infra-estrutura E Logistica, Departamento Aeroportuário, Rio Grande do Sul, Brazil

Key Services

- Project Development
- Airport Planning
- Financial and Economical Assessments
- Financing Assistance

Project Highlights

The team assisted the Department of Airports of Rio Grande do Sul to (1) identify key issues in airport development, (2) obtain project financing, and (3) consider multimodal investments.

Description

KED Group was contracted to provide technical and financial advisory services for launching the airport development program (PROAR) in the state of Rio Grande do Sul, Brazil. As part of this project, we worked with representatives from the Department of Aviation of Rio Grande do Sul (DAP) to provide project development assistance for PROAR.

The KED Team traveled in mid May to conduct a series of airport site visits, gather information, discuss priority issues and to develop a strategy that successfully resulted in a \$650,000 grant for the state government from the U.S. Trade and Development Agency. This grant will provide the funding necessary to conduct a study that will respond to priority goals of the DAP and Secretary of Infrastructure and Logistics Daniel de Moraes Andrade.

As part of this assignment, we assisted the DAP and the Infrastructure and Logistics Department to assess priority developments within the regional context, considering the need to develop multimodal hubs, a "spoke and wheel" airport structure and to foster private investment.
